## Professional Experience

### IT Project Manager (Department of Transportation) September 2018 – October 2019

- Directed over 30 system workloads into the DOT enterprise Amazon Web Services (AWS) and Microsoft Azure cloud network.
- Facilitated and organized over 100 business and technical interchange meetings amongst cloud solution architects, network administrators, server administrators, application/development teams, and security teams.
- Served as cloud teams website, Jira, and Microsoft Teams administrator.
- Collaborated with the application/development team to design the enterprise DevOps model for Amazon Web Services, Microsoft Azure and on-premises systems.
- Led stand-ups, retrospectives, and future planning sessions, utilizing agile scrum and kanban methodology.

### Photographer - Freelance May 2013 – Aug 2018

- Captured numerous live events, including sporting games, expos, underwater photography and military graduation ceremonies.
- Used digital cameras, tripods, lenses and adobe software products to retouch and color correct.

### Military Intelligence Officer (Captain, U.S. Army) August 2007 – May 2014

- During deployment to Afghanistan, incorporated multiple national intelligence databases and assets into combat units to conduct battle tracking and review real time overhead coverage.
- Integrated early versions of Palantir , Google Earth, and ArcGIS into the organizations combat systems toolset.
- Implemented a custom built computer-based decision-making management program to analyze and track \$60 million worth of annual training requirements for Special Operations student training.
- Planned and coordinated a week long base defense exercise with Korean Army, Korean Police and U.S. Soldiers. The exercise validated the training and procedures for base security operations.
- Managed information security, physical security, and security clearances of over 500 soldiers.

## Software Developer Experience
