EXPERIENCE

David Investing – Web Developer

May 2019 - June 2019 | Freelance Contract

www.davidinvesting.com

Designed a landing page for a personal investor using React.Js and bootstrap4 for the front-end and Node.Js with express and body-parser to capture form data, format it, and deliver it to the client. Once finished it was uploaded and configured on AWS.

Schwartzberg Security – Web Developer / UI Designer

Jul 2018 - Aug 2018 | Freelance Contract

www.schwartzbergsecurity.com

Created a Wordpress theme from scratch using HTML, CSS, and JavaScript for a security firm based out of California and wired it to the Wordpress dashboard for easy editing by my client.

GuardianAngels.io – Web Developer / UI Designer

Apr 2018 - Jul 2018 | Freelance Contract

www.guardianangels.io

Designed and developed a full-stack e-commerce website for a small company offering game boosting services for the destiny 1 & 2 role-playing games. Used PHP CodeIgniter framework as the model view controller with a MySQL backend that includes a login and register system, and checkout system wired up to Braintree for payment processing.
