PROFESSIONAL SUMMARY

A software engineer with about 5 years of successful experience leading engineering teams to build and deliver scalable software products. I am highly accomplished at translating business and human requirements into technology-driven solutions that drive positive impacts and actionable insights. As an experienced team member and team lead, across multiple teams both onsite and remotely, I seek to utilize my professional skills in Software Engineering in making impacts through working with and leading high efficient teams to develop production-ready products that have a positive impact on human lives.

TECHNOLOGIES

Front End	CSS3, Bootstrap, HTML5, JavaScript, React.js, React-Native, Angular
Back End	JavaScript, Node.js, Express.js, Sails.js, Ruby on Rails, Docker
Data Stores	MySQL, PostgreSQL, MongoDB, Redis, AWS
Web Servers	Apache Tomcat, Apache HTTP Server, Nginx, Google Web Server
Operating Systems	Linux Red Hat, Ubuntu, Chromium OS, Mac OC, Windows 10, Windows Server

EXPERIENCE

FullStack Application Developer | WesData | Stamford, CT

May 2019 – Present

WesData is a turnkey platform for marketing your products on all major shopping engines and affiliate networks. We pride ourselves on delivering amazing customer service.

- Designed and code application in an agile environment utilizing a test-driven development approach
- Collaborate with other developers to develop features for MVP.
- Managing the growth of the product to be built from inception to its current stage.

- Collaborate with other developers to plan, design, develop, test, and maintain software applications
- Technologies: Javascript, HTML/CSS, Gatsby.js, React, Node.js

Mobile Application Developer |JungleCoders | Paphos,

Oct 2018 – Mar 2019

The jungle is a Startup Studio established by a group of Danish entrepreneurs and coders, who believed that software development in Denmark was gray and too expensive. We offer app development at startup-friendly prices and advise on business strategy and funding – to support founders on their journey from idea to traction.

- Introduced lean software methodology to cut down time wastage
- Established a clear timeline and monitoring systems to successfully manage project delivery within the agreed-upon time frame and budget
- Managing the growth of the product to be built from inception to its current stage.
- Collaborate with other developers to plan, design, develop, test, and maintain software applications
- Developing scalable and testable applications from scratch using a host of technologies including React-Native with Redux on the Front-end and NodeJS/ExpressJs on the backend
- Technologies: Javascript, HTML/CSS, React Native, React, Node.js

Full-stack Software Developer | Cinemaloop Inc. | Sheridan, Wyoming

May 2018 – Feb 2019

Cinemaloop Inc helps in connecting people over the joy of cinema. Cinemaloop is on a mission to design new innovative platform experiences for the moviegoing-loving generations.

- Designed and coded application in an agile environment utilizing a test-driven development approach
- Collaborate with other developers to develop features for MVP.
- Collaborate with software architects and developers to plan, design, develop, test, and maintain software applications
- Technologies:Javascript, React.js, Node, Sails.js

Software Developer| Andela| Lagos, Nigeria

June 2017 – Jan 2018

Andela is a global talent accelerator that produces world-class developers and connects them with top employers. With an acceptance rate below 1%, Andela offers one of the most selective technology training programs in the world. Andela developers, some of the brightest young people in Africa, undergo an intensive training experience with cutting-edge education technology, gaining the skills and experience needed to thrive as full-time, remote developers for companies around the world. Andela is backed by the founders of Facebook, eBay, and AOL and has offices in North America and Africa.

- Contribute software engineering expertise in the development of products through the software lifecycle(SDLC), from requirements definition through successful deployment.
- Use cutting-edge technologies to build scalable and maintainable applications for diverse partners in response to their needs
- Conduct requirements analysis to recommend the best tools for software development
- Research and recommend the best tools required to achieve the client's needs.
- Write maintainable and readable code to make it plain and simple for other developers to understand
- Comprehensively manage projects from initiation stage through deployment.
- Key team leader responsible for getting developers to work on volunteering website development.
- Handle code reviews to ensure code base is understandable, maintainable and readable.
- Participated in sales and marketing outreach to get more prospective partners/clients to understand the company culture.
- Technologies: Javascript, HTML/CSS, React, React Native, MongoDB, Firebase, MySQL, Angular, MongoDB, Node Js, Express, Ruby, Rails

Backend Software Developer | Tuteria | Lagos, Nigeria

Aug 2016 – Oct 2017

Tuteria helps you find quality private teachers and instructors near you for whatever you wish to learn from academic subjects to various local, professional and international exams and even skills like Music, Swimming, Photography, etc.

- Work with other developers to scale the product from 100k users and above using Microservice architecture
- Participate in retrospective meetings and sprint planning to address product requirements according to both business and users' needs.
- Ensure code is tested using the unit, integration and functional tests for higher-quality and high-performance of application.
- Participate in discussions around product design to ensure that the user's needs are put into consideration.
- Developed code fixes and enhancements for inclusion in future code releases and patches.
- Collaborated with developers and performance engineers to enhance supportability and identify performance bottlenecks.
- Technologies: Javascript, HTML/CSS, React, Redux, MySQL, Sequelize ORM, Node Js, Express, Django, Docker, AWS

Software Developer | Lymnet | Lagos, Nigeria

Feb 2014 – Feb 2016

Lymnet is a Startup Studio with ambitions of raising the tech unicorns of tomorrow.

- Provided user requirements analysis, design and programming support for enhancement of the web application.
- Rebuilt and restructured the front-end application from JQuery to Angular 1.
- Executed detailed features highlighted in the user stories for the project at hand..

- Technologies: Javascript, HTML/CSS, JQuery, Angular 1, Php

EDUCATION

BSc Mathematics | University of Nigeria | Enugu, Nigeria
